Professional Summary

A results-oriented DevOps Engineer with almost 4 years of hands-on experience in automating and optimizing **AWS environments**. Specializes in leveraging **Terraform**, and **GitOps** to build robust **CI/CD pipelines**, manage **containerized applications**, and drive significant cloud cost reductions. Passionate about improving system performance and scalability through proactive infrastructure management.

Experience

HashedIn by Deloitte

Oct 2024 – Present

DevOps Engineer -2

Mumbai

- **Re-architected and migrated** legacy on-premises applications to **AWS Fargate**, enabling containerized, serverless deployments that improved scalability and reduced operational overhead by 40%.
- **Led the end-to-end migration** of complex data tiers (Db2, Oracle, MySQL) to AWS using **AWS SCT** and **AWS DMS (CDC)**, ensuring near-zero downtime and seamless data replication.
- Designed secure **AWS Transit Gateway** connections to integrate **Confluent Kafka** with existing AWS VPCs, enhancing cross-account networking and data security.
- Developed reusable **Terraform modules** and **CloudFormation templates** to automate provisioning of Confluent Cloud resources (clusters, topics, and service accounts).
- **Developed an AI-driven Disaster Recovery (DR) agent** that analyzes AWS infrastructure to recommend optimal recovery strategies and **auto-generates Terraform modules** for rapid implementation.
- Implemented **BYOK (Bring Your Own Key)** encryption via **AWS KMS** and enforced enterprise-grade **RBAC** security standards through automated **GitHub Actions** pipelines.

To The New

Sept 2022 – Sept 2024

DevOps Engineer

Noida

- Orchestrated end-to-end automation of cloud infrastructure with **CloudFormation**, reducing deployment time by 50% for high-traffic applications.
- Reduced production incidents by 35% by engineering **CI/CD pipelines** in **GoCD** using **Blue-Green deployment** strategies for zero-downtime rollouts.
- Engineered an automated client onboarding workflow using **Bash scripting**, cutting manual setup time from 5 hours to under 20 minutes.
- Managed a 3-tier application architecture on **AWS ECS**, serving 10K+ daily users and maintaining a 99.9% uptime SLA.
- Implemented an **IAM policy framework** with least-privilege access and integrated external secrets via **AWS Secrets Manager**.

Technical Skills

Cloud Platforms: AWS (EC2, VPC, Fargate, Lambda, S3, RDS, Transit Gateway, DMS), Confluent Cloud

Infrastructure as Code: Terraform, CloudFormation

CI/CD & GitOps: Jenkins, GitHub Actions, GoCD, ArgoCD

Containerization: Docker, AWS ECS, AWS Fargate

Monitoring: Prometheus, Grafana, AWS CloudWatch

Databases & Tools: Kafka, Bash, Linux, Git, SCT, MySQL, Vault

Education

Mumbai University

Sep. 2018 – May 2022

Bachelor of Engineering

Maharashtra, Mumbai

Certifications & Awards

- AWS Certified Solutions Architect – Associate
- AWS Certified AI Practitioner
- HashiCorp Certified: Terraform Associate (003)
- Confluent Certified Developer for Apache Kafka
- Winner – Geek Combat Hackathon (2023)
- Impact Award By Deloitte (2025)
